 [linkedin.com/in/philbertlou](https://linkedin.com/in/philbertlou)

## SKILLS

---

Languages: Python / Java / HTML / CSS / Javascript / C / C#

Technologies: Git / Bootstrap / MongoDB / Express.js / React.js / Node.js / Django / TensorFlow / Selenium / SQLite / Unity Game Engine

## PROJECTS

---

### CLOTHING FORECAST

[github.com/PhilbertLou/ClothingForecast](https://github.com/PhilbertLou/ClothingForecast)

- Engineered a neural network using **TensorFlow** libraries that predicts what a user should wear given a weather condition and temperature
- Taught the network to learn from past choices, adapt to user preferences, and provides personalized clothing combinations by continuously training the network
- Developed backend using **Django** framework, coded in **Python**, and constructed a responsive frontend website using **HTML**, **CSS**, **Javascript**, and **Bootstrap**

### ESSENTIAL

[github.com/PhilbertLou/Essential](https://github.com/PhilbertLou/Essential)

- Created a secure, health-centric web server using **Node.js** and **Express.js** for users to continuously track their water and sugar intake, set goals and restrictions, and build healthy habits
- Implemented **Passport.js** and **bcrypt** to authenticate users and to encrypt passwords stored in **MongoDB**
- Constructed a responsive and easy to use frontend using **Bootstrap** and dynamically rendered web components using **React.js**, providing users with their latest data at all times

### CRYPTOPI

[github.com/ZhouJas/SE101-CryptoPi](https://github.com/ZhouJas/SE101-CryptoPi)

- Collaborated to design a web and mobile application with a **Node.js**, **Express.js**, **MongoDB** backend that allows users to send secure Ethereum transactions via NFC technology
- Authenticated users in the backend using **Microsoft Azure Face API**
- Communicated with the backend from a Raspberry Pi, which contained information about the NFC tags and readers, in **Python**

### DODGE

[bit.ly/38p3Ygc](https://bit.ly/38p3Ygc)

- Published a mobile game on the Google Play Store where users drag their player to avoid moving knives that spawn progressively faster
- Developed the application using **Unity Game Engine**, coded in **C#**, and designed custom assets
- Maintained a five-star rating since release

## EDUCATION

---

### BACHELOR OF SOFTWARE ENGINEERING

University of Waterloo, Waterloo, ON  
2020 - 2025

- 3.9 GPA | 91% Cumulative Average

## INTERESTS

---

- Walking my dog, weightlifting, playing basketball, and investing in stocks

## WORK EXPERIENCE

---

### TEACHING ASSISTANT

Kumon, Oakville, ON - April 2018 - March 2019

- Taught students progressively harder math and English material one on one, leading to significant grade improvement
- Trained other employees how to tutor students through live demonstrations and supervised them while they taught
